Subject Index

P = Proceedings of the Anatomical Society of Great Britain and Ireland (*dem*: Poster demonstration)

Acidic fibroblast growth factor, Acidic fibroblast growth factor modifies the responses to axon injury of vagal preganglionic neurons in the rat (Jacques, *et al.*) **183,** 175, *P*

Adenoid, Variation in the epithelium covering the human nasopharyngeal tonsil (adenoid) (Kirkpatrick, *et al.*) **183,** 199, *dem*

Adrenal gland, The innervation of the mammalian adrenal gland (Parker, *et al.*) **183,** 265

Autonomic control of adrenal function (Edwards & Jones) **183,** 291

Exocytosis in adrenal chromaffin cells (Burgoyne, *et al.*) **183,** 309

Effects of ACTH and aminoglutethimide on the catecholamine content and chromaffin cell morphology of the adrenal medulla of the neonatal rat (Kent & Parker) **183,** 601

Morphological aspects of chromaffin tissue: the differential fixation of adrenaline and noradrenaline (Kobayashi & Coupland) **183,** 223

Novel peptides from adrenomedullary chromaffin vesicles (Sigafoos, *et al.*) **183,** 253

Kinetics of adrenal medullary cells (Verhofstad) **183,** 315

Ageing, Target-specific changes in the dendritic arbors of sympathetic neurons with age (Nesbitt) **183,** 176, *P*

Age-related chemical morphology of human intervertebral discs (Scott, *et al.*) **183,** 188, *P*

Vascular and parenchymal innervation of the urinary tract in young and old rats (Warburton & Santer) **183,** 191, *dem*

The effects of nerve growth factor on neuropeptide expression by aged mouse sensory neurons in vitro (Jiang & Smith) **183,** 192, *dem*

Confocal autofluorescence microscopy of human dental cementum: incremental lines in an age series (Roberts, *et al.*) **183,** 195, *dem*

A light and electron microscopic quantitative analysis of the innervation of axillary lymph nodes in juvenile and old rats (Novotny, *et al.*) **183,** 57

Alzheimer's disease, Increased levels of amyloid precursor protein messenger RNA in Alzheimer's disease brain (Barton & Pearson) **183,** 181, *P*

Aminoglutethimide, Effects of ACTH and aminoglutethimide on the catecholamine content and chromaffin cell morphology of the adrenal medulla of the neonatal rat (Kent & Parker) **183,** 601

Amniochorion, Fcγ receptor-bearing cells in human term amniochorion (Bright & Ockleford) **183,** 187, *P*

Confocal and conventional immunofluorescence and ultrastructural localisation of intracellular strength-giving components of human amniochorion (Ockleford, *et al.*) **183,** 483

Amyloid precursor protein, Increased levels of amyloid precursor protein messenger RNA in Alzheimer's disease brain (Barton & Pearson) **183,** 181, *P*

Anaemia, Maternal anaemia and terminal villus structure in the mature human placenta (Reshetnikova & Burton) **183,** 187, *P*

Angiogenesis, Embryonic angiogenesis: growth pattern and ultrastructural studies on the chick area vasculosa (Allen & Wilson) **183,** 172, *P*

Early embryonic angiogenesis in the chick area vasculosa (Allen & Wilson) **183,** 579

Angiotensin II, Noncholinergic control of adrenal catecholamine secretion (Livett & Marley) **183,** 279

Anionic sites, Blood nerve barrier: characterisation of endothelial anionic sites (Lawrenson, *et al.*) **183,** 195, *dem*

Antedon bifida, Electron microscopical findings on proteoglycans and collagen in the mutable connective tissue of the echinoderm *Antedon bifida* (Erlinger, *et al.*) **183,** 188, *P*

Anterior lacrimal gland, The orbital glands of the terrapin *Pseudemys scripta* in response to osmotic stress: a light and electron microscope study (Chieffi Baccari, *et al.*) **183,** 21

Antlers, Red deer antler osteoclasts (Piper & Jones) **183,** 188, *P*

Ultrastructural preservation of cancellous bone in the antler of an extinct deer (Dickson) **183,** 197, *dem*

Apoptosis, Cell death and phagocytosis of haematopoietic elements at the onset of haematopoiesis in the mouse spleen: an ultrastructural study (Sasaki, *et al.*) **183,** 113

Area vasculosa, Embryonic angiogenesis: growth pattern and ultrastructural studies on the chick area vasculosa (Allen & Wilson) **183,** 172, *P*

Early embryonic angiogenesis in the chick area vasculosa (Allen & Wilson) **183,** 579

Arterial anomaly, Rare origin of the obturator, inferior epigastric and medial circumflex femoral arteries from a common trunk (Sañudo, *et al.*) **183,** 161

Arteries, Comparative anatomical studies on the thyroid and thymic arteries. II. Polyprotodont marsupials (Yamasaki) **183,** 359

Arteriovenous anastomoses, An investigation of the vascular organisation of the canine submandibular gland (Lung) **183,** 619

Articular surface, The biomechanical ambiguity of the articular surface (Kamalanathan & Broom) **183,** 567

Ascending aortic fold, The presence of paraganglia in the human ascending aortic fold: histological and ultrastructural studies (Lebona) **183,** 35

Astrocytes, Activated astrocytes in the mouse brain may contain nitric oxide synthase (Wallace & Bisland) **183,** 195, *dem*

Autonomic control, Autonomic control of adrenal function (Edwards & Jones) **183,** 291

Autoradiography, Quantitation of emulsion autoradiography in in situ hybridisation using image analysis and rate of change filters (Aldridge & Seckl) **183,** 183, *P*

Axon regeneration, An investigation of the reinnervation of muscle spindle proprioceptive pathways after nerve injury in the rat (Fullarton, *et al.*) **183,** 190, *dem*

Axonal injury, Cytochemical analysis of disruption of axonal calcium homeostasis following stretch and crush injury to the adult guinea pig optic nerve (McCreath) **183,** 176, *P*

Axonal regeneration, Quantitative ultrastructural studies of axonal regeneration into peripheral nerve grafts implanted in the adult rat brain (Antoniazzi, *et al.*) **183,** 169, *P*

GAP-43 expression during axonal regeneration into long freeze-killed nerve grafts (Chong, *et al.*) **183,** 170, *P*

Cell adhesion molecules are associated with adult rat central nervous system (CNS) axons regenerating into peripheral nerve grafts (Zhang, *et al.*) **183,** 189, *dem*

Axonal transport, Expression of motor proteins for axonal transport in different neuron types (Bennett) **183,** 182, *P*

Axotomy, The effect of intravitreal peripheral nerve graft on the sprouting of axon-like processes from the retinal ganglion cells at different distances of axotomy from the cell body (Cho & So) **183,** 169, *P*

An electron microscopic study of glycogen distribution in the spinal cord of rats after peripheral axotomy (Shaomei & Atkinson) **183,** 170, *P*

Acidic fibroblast growth factor modifies the responses to axon injury of vagal preganglionic neurons in the rat (Jacques, *et al.*) **183,** 175, *P*

Differences in CGRP expression associated with particular patterns of Nissl body ultrastructure in axotomised motoneurons (Johnson, *et al.*) **183,** 193, *dem*

Beta galactosidase, Electron microscopical detection of migrating β-gal-expressing muscle precursor cells (Watt, *et al.*) **183,** 184, *P*

Birds, The early development of the pulmonary and bronchial vasculature in the quail embryo (Gittenberger-de Groot, *et al.*) **183,** 172, *P*

The avian neural crest targeting to the heart (Poelmann & Gittenberger-de Groot) **183,** 173, *P*
A morphometric study of the oxidative capacity of pectoralis major in migratory and nonmigratory quail (Skepper & Hector) **183,** 200, *dem*
Spermiogenesis and spermiation in the Japanese quail (*Coturnix coturnix japonica*) (Lin & Jones) **183,** 525
The spiral fold of the caecum in the ostrich (*Struthio camelus*) (Bezuidenhout) **183,** 587
Blood–CSF barrier, Uptake of tracer by the epiplexus cells via the choroid plexus epithelium following an intravenous or intraperitoneal injection of horseradish peroxidase in rats (Lu, *et al.*) **183,** 609
Blood-nerve barrier, Blood nerve barrier: characterisation of endothelial anionic sites (Lawrenson, *et al.*) **183,** 195, *dem*
Blood vessels, Anatomical variation of the insertion of scalenus anterior in adult human subjects: implications for clinical practice (Wayman, *et al.*) **183,** 165
Embryonic angiogenesis: growth pattern and ultrastructural studies on the chick area vasculosa (Allen & Wilson) **183,** 172, *P*
Intraoperative papaverine – effect on human internal thoracic artery contraction and relaxation (Hillier) **183,** 177, *P*
Effect of nerve growth factor and vehicle treatment on in oculo reinnervation of transplanted cerebral blood vessels (Gavazzi & Cowen) **183,** 193, *dem*
Bone, Vertebrate homeobox genes: embryos, teeth and bones (Sharpe) **183,** 179, *P*
Localisation of mRNA for cytokines and matrix proteins in adult human bone (Gowen) **183,** 180, *P*
Red deer antler osteoclasts (Piper & Jones) **183,** 188, *P*
Gap junctions between bone cells (Sakamaki, *et al.*) **183,** 195, *dem*
Post-mortem changes in buried human bone (Bell, *et al.*) **183,** 196, *dem*
Ultrastructural preservation of cancellous bone in the antler of an extinct deer (Dickson) **183,** 197, *dem*
Bone graft substitutes, A comparison of the biocompatibility of bone graft substitutes for human osteoblasts (Begley) **183,** 176, *P*
Bone remodelling, Bone remodelling in the horse radius (Haroon, *et al.*) **183,** 196, *dem*

The effect of GABA on neurite growth in cultures of mouse striatum (Owen, *et al.*) **183,** 192, *dem*
The presence of a peripheral nerve graft in the adult rat corpus striatum has no effect on cholinergic somal size (Woolhead & Anderson) **183,** 192, *dem*
An investigation into the fate of NADPH-diaphorase-containing enteric neurons implanted into the corpus striatum of adult rats (Tew, *et al.*) **183,** 193, *dem*
Distribution of calcium-binding proteins in the intermediate and medial hyperstriatum ventrale (IMHV) of the domestic chick (*Gallus gallus domesticus*) (Ambalavanar, *et al.*) **183,** 194, *dem*
Activated astrocytes in the mouse brain may contain nitric oxide synthase (Wallace & Bisland) **183,** 195, *dem*
Breast cancer, Lectin histochemical investigations on human breast cancer lines (Schumacher, *et al.*) **183,** 173, *P*
5-Bromo-2-deoxy-uridine, Kinetics of adrenal medullary cells (Verhofstad) **183,** 315

Caecum, The spiral fold of the caecum in the ostrich (*Struthio camelus*) (Bezuidenhout) **183,** 587
Calcaneus, Arthritis of the subtalar joint associated with sustentaculum tali facet configuration (Drayer-Verhagen) **183,** 631
Calcium, Exocytosis in adrenal chromaffin cells (Burgoyne, *et al.*) **183,** 309
Calcium homeostasis, Cytochemical analysis of disruption of axonal calcium homeostasis following stretch and crush injury to the adult guinea pig optic nerve (McCreath) **183,** 176, *P*
Calcium-binding proteins, Distribution of calcium-binding proteins in the intermediate and medial hyperstriatum ventrale (IMHV) of the domestic chick (*Gallus gallus domesticus*) (Ambalavanar, *et al.*) **183,** 194, *dem*
Carp, The growth response of the lateral musculature of carp (*Cyprinus carpio* L.) to temperature (Nathanailides, *et al.*) **183,** 184, *P*
Cartilage, A comparison of tendon fibrocartilage in the rat, the rabbit and the mouse: a histological and immunohistochemical study (Dowthwaite, *et al.*) **183,** 197, *dem*
The biomechanical ambiguity of the articular surface (Kamalanathan & Broom) **183,** 567
Catecholamine fixation, Morphological aspects of chromaffin tissue: the differential fixation of adrenaline and noradrenaline (Kobayashi & Coupland) **183,** 223
Catecholamine secretion, Noncholinergic control of adrenal catecholamine secretion (Livett & Marley) **183,** 279
Catecholamine uptake, Morphological aspects of chromaffin tissue: the differential fixation of adrenaline and noradrenaline (Kobayashi & Coupland) **183,** 223
Catecholamines, The adrenal chromaffin granule: a model for large dense core vesicles of endocrine and nervous tissue (Winkler) **183,** 237
Autonomic control of adrenal function (Edwards & Jones) **183,** 291
Effects of ACTH and aminoglutethimide on the catecholamine content and chromaffin cell morphology of the adrenal medulla of the neonatal rat (Kent & Parker) **183,** 601
Cell adhesion molecules, Cell adhesion molecules are associated with adult rat central nervous system (CNS) axons regenerating into peripheral nerve grafts (Zhang, *et al.*) **183,** 189, *dem*
Cell death, Cell death and phagocytosis of haematopoietic elements at the onset of haematopoiesis in the mouse spleen: an ultrastructural study (Sasaki, *et al.*) **183,** 113
A scanning electron microscopic study of the chick chorioallantoic membrane: cell death and the involvement of oxygen free radicals (Easterling) **183,** 178, *P*
Cell kinetics, Kinetics of adrenal medullary cells (Verhofstad) **183,** 315
Cell proliferation, Kinetics of adrenal medullary cells (Verhofstad) **183,** 315

Cell surface molecules, Monoclonal antibodies recognising stage and region specific epitopes in embryonic mouse palatal epithelial cells (Dixon, *et al.*) **183,** 423
Cementum, Confocal autofluorescence microscopy of human dental cementum: incremental lines in an age series (Roberts, *et al.*) **183,** 195, *dem*
Central nervous system, Cell adhesion molecules are associated with adult rat central nervous system (CNS) axons regenerating into peripheral nerve grafts (Zhang, *et al.*) **183,** 189, *dem*
Cerebellum, Purkinje cell complements in mammalian cerebella and the biases incurred by counting nucleoli (Mwamengele, *et al.*) **183,** 155
Cerebral hemispheres, A study of lateral symmetry and sexual dimorphism in the cerebral hemispheres of selected domestic mammals (Mwamengele, *et al.*) **183,** 174, *P*
CGRP, The tammar wallaby (*Macropus eugenii*) and the Sprague–Dawley rat: comparative anatomy and physiology of inguinoscrotal testicular descent (Griffiths, *et al.*) **183,** 441
CGRP expression, Differences in CGRP expression associated with particular patterns of Nissl body ultrastructure in axotomised motoneurons (Johnson, *et al.*) **183,** 193, *dem*
Chemoreceptors, Neuroepithelial bodies in the Fawn Hooded rat lung: morphological and neuroanatomical evidence for a sensory innervation (Van Lommel & Lauweryns) **183,** 553
Chick, Embryonic angiogenesis: growth pattern and ultrastructural studies on the chick area vasculosa (Allen & Wilson) **183,** 172, *P*
Hyperthermia and its effect on the development of the chick interatrial septum (El Habbal, *et al.*) **183,** 173, *P*
A scanning electron microscopic study of the chick chorioallantoic membrane: cell death and the involvement of oxygen free radicals (Easterling) **183,** 178, *P*
The temporospatial distribution of mRNA for collagen type I in the chick cornea (Clark, *et al.*) **183,** 182, *P*
Further studies on wound healing in the midbrain of the chick embryo (Lawson & England) **183,** 190, *dem*
Distribution of calcium-binding proteins in the intermediate and medial hyperstriatum ventrale (IMHV) of the domestic chick (*Gallus gallus domesticus*) (Ambalavanar, *et al.*) **183,** 194, *dem*
Early embryonic angiogenesis in the chick area vasculosa (Allen & Wilson) **183,** 579
The avian prechordal head region: a morphological study (Seifert, *et al.*) **183,** 75
Primordial germ cells in the primitive streak stages chick embryo as studied by scanning electron microscopy (England & Matsumura) **183,** 67
Chicken, Fine structure of the middle ear epithelium in the chicken (*Gallus gallus*) (Giannessi & Ruffoli) **183,** 103
Cholinergic neurons, The presence of a peripheral nerve graft in the adult rat corpus striatum has no effect on cholinergic somal size (Woolhead & Anderson) **183,** 192, *dem*
Chondroitin sulphate, Ultrastructural and biochemical observations on proteoglycans and collagen in the mutable connective tissue of the feather star *Antedon bifida* (Echinodermata, Crinoidea) (Erlinger, *et al.*) **183,** 1
Chorioallantoic membrane, A scanning electron microscopic study of the chick chorioallantoic membrane: cell death and the involvement of oxygen free radicals (Easterling) **183,** 178, *P*
Choroid plexus, Intraventricular macrophages in the lateral ventricles with special reference to epiplexus cells: a quantitative analysis and their uptake of fluorescent tracer injected intraperitoneally in rats of different ages (Lu, *et al.*) **183,** 405
Choroid plexus epithelium, Uptake of tracer by the epiplexus cells via the choroid plexus epithelium following an intravenous or intraperitoneal injection of horseradish peroxidase in rats (Lu, *et al.*) **183,** 609
Chromaffin cell, The chromaffin cell: paradigm in cell, developmental and growth factor biology (Unsicker) **183,** 207
Chromaffin cells, Morphological aspects of chromaffin tissue: the differential fixation of adrenaline and noradrenaline (Kobayashi & Coupland) **183,** 223
Noncholinergic control of adrenal catecholamine secretion (Livett & Marley) **183,** 279
Exocytosis in adrenal chromaffin cells (Burgoyne, *et al.*) **183,** 309
Comparative morphology, cytochemistry and innervation of chromaffin tissue in vertebrates (Scheuermann) **183,** 327
Effects of ACTH and aminoglutethimide on the catecholamine content and chromaffin cell morphology of the adrenal medulla of the neonatal rat (Kent & Parker) **183,** 601
Chromaffin vesicle peptides, Novel peptides from adrenomedullary chromaffin vesicles (Sigafoos, *et al.*) **183,** 253
Chromogranins, The adrenal chromaffin granule: a model for large dense core vesicles of endocrine and nervous tissue (Winkler) **183,** 237
Novel peptides from adrenomedullary chromaffin vesicles (Sigafoos, *et al.*) **183,** 253
Ciliation, Scanning electron microscopy of goat oviductal epithelial cells at the follicular and luteal phases of the oestrous cycle (Abe, *et al.*) **183,** 415
Collagen, Ultrastructural and biochemical observations on proteoglycans and collagen in the mutable connective tissue of the feather star *Antedon bifida* (Echinodermata, Crinoidea) (Erlinger, *et al.*) **183,** 1
The temporospatial distribution of mRNA for collagen type I in the chick cornea (Clark, *et al.*) **183,** 182, *P*
Electron microscopical findings on proteoglycans and collagen in the mutable connective tissue of the echinoderm *Antedon bifida* (Erlinger, *et al.*) **183,** 188, *P*
Confocal, Confocal and conventional immunofluorescence and ultrastructural localisation of intracellular strength-giving components of human aminochorion (Ockleford, *et al.*) **183,** 483
Connective tissue, Electron microscopical findings on proteoglycans and collagen in the mutable connective tissue of the echinoderm *Antedon bifida* (Erlinger, *et al.*) **183,** 188, *P*
Cornea, The temporospatial distribution of mRNA for collagen type I in the chick cornea (Clark, *et al.*) **183,** 182, *P*
Expression of major histocompatibility antigen Class II in normal canine cornea and in chronic superficial keratitis (Williams & Soydan) **183,** 199, *dem*
Corpus striatum, The presence of a peripheral nerve graft in the adult rat corpus striatum has no effect on cholinergic somal size (Woolhead & Anderson) **183,** 192, *dem*
An investigation into the fate of NADPH-diaphorase-containing enteric neurons implanted into the corpus striatum of adult rats (Tew, *et al.*) **183,** 193, *dem*
Cranial venae cavae, Blood supply to the cranial venae cavae and the heart in the laboratory shrew (*Suncus murinus*) (Isomura) **183,** 537
Cupromeronic Blue, Ultrastructural and biochemical observations on proteoglycans and collagen in the mutable connective tissue of the feather star *Antedon bifida* (Echinodermata, Crinoidea) (Erlinger, *et al.*) **183,** 1
CYP4A, An investigation of CYP4A mRNA expression in the embryonic rat using in situ hybridisation (Simpson, *et al.*) **183,** 183, *P*
Cytochrome oxidase, Peripheral nerve graft enhances survival of cytochrome oxidase-rich retinal ganglion cells (von Bussmann, *et al.*) **183,** 189, *dem*
Cytokeratin, Effects of hyperthermia on viability, morphology and cytokeratin organisation of the IEC-6 cell line (Hazzard) **183,** 176, *P*
Cytokines, Localisation of mRNA for cytokines and matrix proteins in adult human bone (Gowen) **183,** 180, *P*

Deer, Red deer antler osteoclasts (Piper & Jones) **183,** 188, *P*
Ultrastructural preservation of cancellous bone in the antler of an extinct deer (Dickson) **183,** 197, *dem*
Dendritic arbors, Target-specific changes in the dendritic arbors of sympathetic neurons with age (Nesbitt) **183,** 176, *P*
Dendritic development, Postnatal dendritic development of sciatic motoneurons under normal conditions and following

neonatal nerve injury in the rat (O'Hanlon & Lowrie) **183,** 189, *dem*

Desmin, Confocal and conventional immunofluorescence and ultrastructural localisation of intracellular strength-giving components of human aminochorion (Ockleford, *et al.*) **183,** 483

Development, Development of the eye in the North American opossum (McMenamin & Krause) **183,** 343

Fine structure and development of ionocyte areas in the labyrinth of the trout (*Salmo trutta fario*) (Becerra & Anadon) **183,** 463

Diabetes mellitus, Increased synthesis of epidermal growth factor mRNA in the kidneys of streptozotocin-induced diabetic rats revealed by in situ hybridisation histochemistry (Mundy, *et al.*) **183,** 182, *P*

Parenchymal compartments of the human placenta and the effects of maternal diabetes mellitus, mode of delivery and sex of neonate (Mayhew, *et al.*) **183,** 186, *P*

The effects of mode of delivery and sex of newborn on placental morphology in control and diabetic pregnancies (Mayhew, *et al.*) **183,** 545

Didelphis virginiana, Development of the eye in the North American opossum (McMenamin & Krause) **183,** 343

Diplegia, Pathogenesis of diplegia (Hobbs & Crawford) **183,** 195, *dem*

Dipnoi, Comparative morphology, cytochemistry and innervation of chromaffin tissue in vertebrates (Scheuermann) **183,** 327

Distal tubule, Reconsideration of the development of the distal tubule of the human kidney (Howie, *et al.*) **183,** 141

Ear, Computer-aided 3-dimensional reconstruction of the inner ear apparatus of the mouse embryo between 10·25–10·5 and 12·5–13 days p.c. (Theiler Stages 16–21) (Bartos, *et al.*) **183,** 198, *dem*

Echinodermata, Ultrastructural and biochemical observations on proteoglycans and collagen in the mutable connective tissue of the feather star *Antedon bifida* (Echinodermata, Crinoidea) (Erlinger, *et al.*) **183,** 1

Electron microscopical findings on proteoglycans and collagen in the mutable connective tissue of the echinoderm *Antedon bifida* (Erlinger, *et al.*) **183,** 188, *P*

Emys orbicularis, The embryological development of primary visual centres in the turtle *Emys orbicularis* (Hergueta, *et al.*) **183,** 367

Endolymph secretion, Fine structure and development of ionocyte areas in the labyrinth of the trout (*Salmo trutta fario*) (Becerra & Anadon) **183,** 463

Endothelium, Blood nerve barrier: characterisation of endothelial anionic sites (Lawrenson, *et al.*) **183,** 195, *dem*

Enteric nervous system, Immunohistochemistry for protein gene product 9·5 in the enteric nervous system (Krammer, *et al.*) **183,** 170, *P*

Enteric neurons, An investigation into the fate of NADPH-diaphorase-containing enteric neurons implanted into the corpus striatum of adult rats (Tew, *et al.*) **183,** 193, *dem*

Enzyme cytochemistry, Quantitative enzyme cytochemistry during human macrophage development (Sokol, *et al.*) **183,** 97

Epidermal growth factor, Increased synthesis of epidermal growth factor mRNA in the kidneys of streptozotocin-induced diabetic rats revealed by in situ hybridisation histochemistry (Mundy, *et al.*) **183,** 182, *P*

Epiplexus cells, Intraventricular macrophages in the lateral ventricles with special reference to epiplexus cells: a quantitative analysis and their uptake of fluorescent tracer injected intraperitoneally in rats of different ages (Lu, *et al.*) **183,** 405

Uptake of tracer by the epiplexus cells via the choroid plexus epithelium following an intravenous or intraperitoneal injection of horseradish peroxidase in rats (Lu, *et al.*) **183,** 609

Epithelial cells, Scanning electron microscopy of goat oviductal epithelial cells at the follicular and luteal phases of the oestrous cycle (Abe, *et al.*) **183,** 415

Epithelial differentation, Monoclonal antibodies recognising stage and region specific epitopes in embryonic mouse palatal epithelial cells (Dixon, *et al.*) **183,** 423

Epithelial membrane antigen, Immunohistochemical and semiquantitative study of the apical mitochondria-rich cells of the human prepubertal and adult epididymis (Regadera, *et al.*) **183,** 507

Epithelium, Fine structure of the middle ear epithelium in the chicken (*Gallus gallus*) (Giannessi & Ruffoli) **183,** 103

Variation in the epithelium covering the human nasopharyngeal tonsil (adenoid) (Kirkpatrick, *et al.*) **183,** 199, *dem*

Morphometric investigations of epithelial change during the development of the ventral surface of the hamster tongue (Go & White) **183,** 200, *dem*

Morphometric site differences in suprabasal cell nuclei in the fetal oronasal epithelium prior to secondary palatal shelf elevation (Chan & White) **183,** 201, *dem*

Morphometric differences in basal cell volume in the developing oronasal epithelium before palate fusion (Chan & White) **183,** 201, *dem*

A histological morphometric study of the growth and differentiation of hamster hard palate epithelium (Cheung & White) **183,** 201, *dem*

Euclidean distance matrix analysis, Sexual dimorphism in the human face assessed by euclidean distance matrix analysis (Ferrario, *et al.*) **183,** 593

Exfoliative cytology, Exfoliative cytology: a potential diagnostic tool for human oral malignancy (Murray) **183,** 178, *P*

Exocytosis, The adrenal chromaffin granule: a model for large dense core vesicles of endocrine and nervous tissue (Winkler) **183,** 237

Exocytosis in adrenal chromaffin cells (Burgoyne, *et al.*) **183,** 309

Experimental allergic neuritis, An investigation of the Schwann cell plasma in experimental allergic neuritis using freeze-fracture electron microscopy (Howe & Ghabriel) **183,** 171, *P*

Extensor carpi ulnaris, Deep and shallow forms of the sulcus for extensor carpi ulnaris (Nakashima, *et al.*) **183,** 635

Eye, Development of the eye in the North American opossum (McMenamin & Krause) **183,** 343

Eyelid development, Eyelid development, fusion and subsequent reopening in the mouse (Findlater, *et al.*) **183,** 121

Face, Sexual dimorphism in the human face assessed by euclidean distance matrix analysis (Ferrario, *et al.*) **183,** 593

Fatigue resistance, Changes in length/tension properties and fatigue resistance in distracted muscles (Williams, *et al.*) **183,** 184, *P*

Fcγ receptors, Fcγ receptor-bearing cells in human term amniochorion (Bright & Ockleford) **183,** 187, *P*

Fish, The growth response of the lateral musculature of carp (*Cyprinus carpio* L.) to temperature (Nathanailides, *et al.*) **183,** 184, *P*

Form analysis, Sexual dimorphism in the human face assessed by euclidean distance matrix analysis (Ferrario, *et al.*) **183,** 593

Fractionator, Purkinje cell complements in mammalian cerebella and the biases incurred by counting nucleoli (Mwamengele, *et al.*) **183,** 155

Free radicals, A scanning electron microscopic study of the chick chorioallantoic membrane: cell death and the involvement of oxygen free radicals (Easterling) **183,** 178, *P*

GABA, The effect of GABA on neurite growth in cultures of mouse striatum (Owen, *et al.*) **183,** 192, *dem*

Gamma irradiation, Effects of single and protracted doses of gamma rays on small intestine 3 days after irradiation (Brennan, *et al.*) **183,** 199, *dem*

Ganglion cells, Peripheral nerve graft enhances survival of cytochrome oxidase-rich retinal ganglion cells (von Bussmann, *et al.*) **183,** 189, *dem*

Gap junctions, Gap junctions between bone cells (Sakamaki, *et al.*) **183,** 195, *dem*

GAP-43, GAP-43 expression during axonal regeneration into long freeze-killed nerve grafts (Chong, *et al.*) **183,** 170, *P*

Gene expression, The expression of the parathyroid hormone-

related protein gene during development (Beck, *et al.*) **183,** 180, *P*
Effects of retinoic acid on gene expression in the developing mouse hindbrain (Wood & Morriss-Kay) **183,** 181, *P*
Differential gene expression in the dorsal hippocampus of the normal adult rat (Najlerahim & Heath) **183,** 181, *P*
Gene expression following the direct injection of DNA into skeletal muscle: uses and limitations (Wells) **183,** 185, *P*
Glucocorticoids, Effects of ACTH and aminoglutethimide on the catecholamine content and chromaffin cell morphology of the adrenal medulla of the neonatal rat (Kent & Parker) **183,** 601
Glycogen, An electron microscopic study of glycogen distribution in the spinal cord of rats after peripheral axotomy (Shaomei & Atkinson) **183,** 170, *P*
Goat, Scanning electron microscopy of goat oviductal epithelial cells at the follicular and luteal phases of the oestrous cycle (Abe, *et al.*) **183,** 415
Gonadal development, Gondal development in the opossum, *Monodelphis domestica*: the rete ovarii does not contribute to the steroidogenic tissues (Maitland & Ullmann) **183,** 43
Granulated metrial gland cells, Granulated metrial gland cells in the uterus and placenta of the woodmouse (Stewart & Clarke) **183,** 198, *dem*
Granulomata, Use of methyl green pyronin in experimental granulomata (Barnes) **183,** 175, *P*
Growth factors, The chromaffin cell: paradigm in cell, developmental and growth factor biology (Unsicker) **183,** 207
Gubernaculum, The tammar wallaby (*Macropus eugenii*) and the Sprague–Dawley rat: comparative anatomy and physiology of inguinoscrotal testicular descent (Griffiths, *et al.*) **183,** 441
Guinea pig, Cytochemical analysis of disruption of axonal calcium homeostasis following stretch and crush injury to the adult guinea pig optic nerve (McCreath) **183,** 176, *P*
The effect of maternal undernutrition on the development of placental components in the guinea pig (Dwyer, *et al.*) **183,** 186, *P*
An immunogold study of neuropeptide coexistence in the inferior mesenteric ganglion of the guinea pig (Mitchell & Stauber) **183,** 194, *dem*
The effect of maternal undernutrition, imposed before or after the first trimester, on muscle fibre number development in the guinea pig fetus (Dwyer, *et al.*) **183,** 200, *dem*
Gutteral pouch, Is the guttural pouch of the horse a brain-cooling device? (Baptiste, *et al.*) **183,** 174, *P*

Haematopoiesis, Cell death and phagocytosis of haematopoietic elements at the onset of haematopoiesis in the mouse spleen: an ultrastructural study (Sasaki, *et al.*) **183,** 113
Hamster, Morphometric investigations of epithelial change during the development of the ventral surface of the hamster tongue (Go & White) **183,** 200, *dem*
A histological morphometric study of the growth and differentiation of hamster hard palate epithelium (Cheung & White) **183,** 201, *dem*
Hand, Distribution of pacinian corpuscles in the hand of the monkey, *Macaca fuscata* (Kumamoto, *et al.*) **183,** 149
Hard palate, A histological morphometric study of the growth and differentiation of hamster hard palate epithelium (Cheung & White) **183,** 201, *dem*
Harderian gland, The orbital glands of the terrapin *Pseudemys scripta* in response to osmotic stress: a light and electron microscope study (Chieffi Baccari, *et al.*) **183,** 21
Heart, Hyperthermia and its effect on the development of the chick interatrial septum (El Habbal, *et al.*) **183,** 173, *P*
The avian neural crest targeting to the heart (Poelmann & Gittenberger-de Groot) **183,** 173, *P*
Microvascular responses to ischaemia and reperfusion in the isolated rat heart (McCarthy) **183,** 177, *P*
Heart innervation, Development of the peptidergic innervation of human heart (Gordon, *et al.*) **183,** 131
Hindbrain, Effects of retinoic acid on gene expression in the developing mouse hindbrain (Wood & Morriss-Kay) **183,** 181, *P*
Hippocampus, Differential gene expression in the dorsal hippocampus of the normal adult rat (Najlerahim & Heath) **183,** 181, *P*
Histocompatibility antigens, Expression of major histocompatibility antigen Class II in normal canine cornea and in chronic superficial keratitis (Williams & Soydan) **183,** 199, *dem*
Homebox, Spatial localisation of transcripts of the *Hox-C6** gene (Shimeld, *et al.*) **183,** 515
Homeobox genes, Vertebrate homeobox genes: embryos, teeth and bones (Sharpe) **183,** 179, *P*
Homeodomain, Spatial localisation of transcripts of the *Hox-C6** gene (Shimeld, *et al.*) **183,** 515
Horse, Is the guttural pouch of the horse a brain-cooling device? (Baptiste, *et al.*) **183,** 174, *P*
Bone remodelling in the horse radius (Haroon, *et al.*) **183,** 196, *dem*
Hoxgene, Spatial localisation of transcripts of the *Hox-C6** gene (Shimeld, *et al.*) **183,** 515
Human epididymis, Immunohistochemical and semiquantitative study of the apical mitochondria-rich cells of the human prepubertal and adult epididymis (Regadera, *et al.*) **183,** 507
Hyperglycaemia, Hyperglycaemia and hyperosmolality: their teratogenic potential and possible mechanisms of action (Travers, *et al.*) **183,** 172, *P*
Hyperosmolality, Hyperglycaemia and hyperosmolality: their teratogenic potential and possible mechanisms of action (Travers, *et al.*) **183,** 172, *P*
Hyperstriatum, Distribution of calcium-binding proteins in the intermediate and medial hyperstriatum ventrale (IMHV) of the domestic chick (*Gallus gallus domesticus*) (Ambalavanar, *et al.*) **183,** 194, *dem*
Hyperthermia, Hyperthermia and its effect on the development of the chick interatrial septum (El Habbal, *et al.*) **183,** 173, *P*
Effects of hyperthermia on viability, morphology and cytokeratin organisation of the IEC-6 cell line (Hazzard) **183,** 176, *P*

IEC-6 cell line, Effects of hyperthermia on viability, morphology and cytokeratin organisation of the IEC-6 cell line (Hazzard) **183,** 176, *P*
Ileum, Lymphatic drainage from the distal small intestine in sheep (Lowden & Heath) **183,** 13
Image analysis, Quantitation of emulsion autoradiography in in situ hybridisation using image analysis and rate of change filters (Aldridge & Seckl) **183,** 183, *P*
Immunocytochemistry, Development of the peptidergic innervation of human heart (Gordon, *et al.*) **183,** 131
Immunofluorescence, Confocal and conventional immunofluorescence and ultrastructural localisation of intracellular strength-giving components of human amniochorion (Ockleford, *et al.*) **183,** 483
Immunohistochemistry, In situ hybridisation for mRNA as an adjunct to immunohistochemistry: experiences of a dedicated core facility for in situ hybridisation (Poulsom) **183,** 182, *P*
In situ hybridisation, The use of in situ hybridisation to study tissue-specific gene expression in skeletal muscle during postnatal development in response to mechanical stimuli (Goldspink) **183,** 178, *P*
Muscle injury: new aspects revealed by in situ hybridisation (Russell, *et al.*) **183,** 179, *P*
The intracellular spatial distribution of nucleic acids revealed by in situ hybridisation (Singer, *et al.*) **183,** 179, *P*
Increased synthesis of epidermal growth factor mRNA in the kidneys of streptozotocin-induced diabetic rats revealed by in situ hybridisation histochemistry (Mundy, *et al.*) **183,** 182, *P*
Quantitation of emulsion autoradiography in in situ hybridisation using image analysis and rate of change filters (Aldridge & Seckl) **183,** 183, *P*
An investigation of CYP4A mRNA expression in the embryonic rat using in situ hybridisation (Simpson, *et al.*) **183,** 183, *P*
In situ hybridisation for mRNA as an adjunct to

immunohistochemistry: experiences of a dedicated core facility for in situ hybridisation (Poulsom) **183,** 182, *P*

Inferior epigastric artery, Rare origin of the obturator, inferior epigastric and medial circumflex femoral arteries from a common trunk (Sañudo, *et al.*) **183,** 161

Inferior mesenteric ganglion, An immunogold study of neuropeptide coexistence in the inferior mesenteric ganglion of the guinea pig (Mitchell & Stauber) **183,** 194, *dem*

Innervation, Vascular and parenchymal innervation of the urinary tract in young and old rats (Warburton & Santer) **183,** 191, *dem*

The innervation of the mammalian adrenal gland (Parker, *et al.*) **183,** 265

A light and electron microscopic quantitative analysis of the innervation of axillary lymph nodes in juvenile and old rats (Novotny, *et al.*) **183,** 57

Insulin receptors, Immunocytochemical localisation of insulin receptors on cultured sympathetic ganglion cells (James, *et al.*) **183,** 194, *dem*

Integrating microdensitometry, Quantitative enzyme cytochemistry during human macrophage development (Sokol, *et al.*) **183,** 97

Interatrial septum, Hyperthermia and its effect on the development of the chick interatrial septum (El Habbal, *et al.*) **183,** 173, *P*

Intervertebral discs, Age-related chemical morphology of human intervertebral discs (Scott, *et al.*) **183,** 188, *P*

Intestine, Effects of single and protracted doses of gamma rays on small intestine 3 days after irradiation (Brennan, *et al.*) **183,** 199, *dem*

Ionocytes, Fine structure and development of ionocyte areas in the labyrinth of the trout (*Salmo trutta fario*) (Becerra & Anadon) **183,** 463

Ischaemia, Microvascular responses to ischaemia and reperfusion in the isolated rat heart (McCarthy) **183,** 177, *P*

Japanese quail, Spermiogenesis and spermiation in the Japanese quail (*Coturnix coturnix japonica*) (Lin & Jones) **183,** 525

Keratins, Monoclonal antibodies recognising stage and region specific epitopes in embryonic mouse palatal epithelial cells (Dixon, *et al.*) **183,** 423

Immunohistochemical and semiquantitative study of the apical mitochondria-rich cells of the human prepubertal and adult epididymis (Regadera, *et al.*) **183,** 507

Keratitis, Expression of major histocompatibility antigen Class II in normal canine cornea and in chronic superficial keratitis (Williams & Soydan) **183,** 199, *dem*

Kidney, Reconsideration of the development of the distal tubule of the human kidney (Howie, *et al.*) **183,** 141

Increased synthesis of epidermal growth factor mRNA in the kidneys of streptozotocin-induced diabetic rats revealed by in situ hybridisation histochemistry (Mundy, *et al.*) **183,** 182, *P*

Morphometric comparison of the kidneys of dwarf and Lewis rats (Baillie, *et al.*) **183,** 202, *dem*

Laboratory shrew, Blood supply to the cranial venae cavae and the heart in the laboratory shrew (*Suncus murinus*) (Isomura) **183,** 537

Labyrinth, Fine structure and development of ionocyte areas in the labyrinth of the trout (*Salmo trutta fario*) (Becerra & Anadon) **183,** 463

Leather workers, An investigation into the factors involved in the increased perinatal mortality rate amongst female leather workers (Drage) **183,** 177, *P*

Lectin histochemistry, Lectin histochemical investigations on human breast cancer lines (Schumacher, *et al.*) **183,** 173, *P*

Lung, The early development of the pulmonary and bronchial vasculature in the quail embryo (Gittenberger-de Groot, *et al.*) **183,** 172, *P*

Lungs, Neuroepithelial bodies in the Fawn Hooded rat lung: morphological and neuroanatomical evidence for a sensory innervation (Van Lommel & Lauweryns) **183,** 553

Lymph node, Lymphatic drainage from the distal small intestine in sheep (Lowden & Heath) **183,** 13

Lymph nodes, A light and electron microscopic quantitative analysis of the innervation of axillary lymph nodes in juvenile and old rats (Novotny, *et al.*) **183,** 57

Lymphatic drainage, Lymphatic drainage from the distal small intestine in sheep (Lowden & Heath) **183,** 13

Lymphatic vessel, Lymphatic drainage from the distal small intestine in sheep (Lowden & Heath) **183,** 13

Macaca fuscata, Distribution of pacinian corpuscles in the hand of the monkey, *Macaca fuscata* (Kumamoto, *et al.*) **183,** 149

Macrophages, Histochemical evidence for microglia-like macrophages in the rat trigeminal ganglion (Glenn, *et al.*) **183,** 475

Quantitative enzyme cytochemistry during human macrophage development (Sokol, *et al.*) **183,** 97

Marsupial, Development of the eye in the North American opossum (McMenamin & Krause) **183,** 343

Gonadal development in the opossum, *Monodelphis domestica*: the rete ovarii does not contribute to the steroidogenic tissues (Maitland & Ullmann) **183,** 43

The tammar wallaby (*Macropus eugenii*) and the Sprague–Dawley rat: comparative anatomy and physiology of inguinoscrotal testicular descent (Griffiths, *et al.*) **183,** 441

Marsupials, Comparative anatomical studies on the thyroid and thymic arteries. II. Polyprotodont marsupials (Yamasaki) **183,** 359

Matrix proteins, Localisation of mRNA for cytokines and matrix proteins in adult human bone (Gowen) **183,** 180, *P*

'Max' factor, Is trigeminal neurotropic factor ('max' factor) involved in determination of innervation density? (Warrilow) **183,** 175, *P*

Medial circumflex femoral artery, Rare origin of the obturator, inferior epigastric and medial circumflex femoral arteries from a common trunk (Sañudo, *et al.*) **183,** 161

Mesenchyme, Induction of prostatic morphogenesis by neonatal rat seminal vesicle mesenchyme (Wong & Kong) **183,** 171, *P*

Methyl green pyronin, Use of methyl green pyronin in experimental granulomata (Barnes) **183,** 175, *P*

Mice, Satellite cell content in muscles of large and small mice (Brown & Stickland) **183,** 91

Microglia, Retinal microglia in developing rats with neonatal optic nerve crush (Chan, *et al.*) **183,** 169, *P*

Histochemical evidence for microglia-like macrophages in the rat trigeminal ganglion (Glenn, *et al.*) **183,** 475

Micromechanical studies, The biomechanical ambiguity of the articular surface (Kamalanathan & Broom) **183,** 567

Microspectrofluorometry, Comparative morphology, cytochemistry and innervation of chromaffin tissue in vertebrates (Scheuermann) **183,** 327

Midbrain, Further studies on wound healing in the midbrain of the chick embryo (Lawson & England) **183,** 190, *dem*

Middle ear, Fine structure of the middle ear epithelium in the chicken (*Gallus gallus*) (Giannessi & Ruffoli) **183,** 103

Mitochondrial function, Myopathy in vitamin E deficient rats: muscle fibre necrosis associated with disturbances of mitochondrial function (Thomas, *et al.*) **183,** 451

Mode of delivery, The effects of mode of delivery and sex of newborn on placental morphology in control and diabetic pregnancies (Mayhew, *et al.*) **183,** 545

Monkey, Distribution of pacinian corpuscles in the hand of the monkey, *Macaca fuscata* (Kumamoto, *et al.*) **183,** 149

Monocytes, Quantitative enzyme cytochemistry during human macrophage development (Sokol, *et al.*) **183,** 97

Monodelphis domestica, Gonadal development in the opossum, *Monodelphis domestica*: the rete ovarii does not contribute to the steroidogenic tissues (Maitland & Ullmann) **183,** 43

Motoneurons, Postnatal dendritic development of sciatic motoneurons under normal conditions and following neonatal nerve injury in the rat (O'Hanlon & Lowrie) **183,** 189, *dem*

The fate of motoneurons in the spinal cord following

peripheral nerve repair: a quantitative study using the neural tracer horseradish peroxidase (Gilmour, *et al.*) **183,** 190, *dem*
Differences in CGRP expression associated with particular patterns of Nissl body ultrastructure in axotomised motoneurons (Johnson, *et al.*) **183,** 193, *dem*
Motor proteins, Expression of motor proteins for axonal transport in different neuron types (Bennett) **183,** 182, *P*
Mouse, Cell death and phagocytosis of haematopoietic elements at the onset of haematopoiesis in the mouse spleen: an ultrastructural study (Sasaki, *et al.*) **183,** 113
Eyelid development, fusion and subsequent reopening in the mouse (Findlater, *et al.*) **183,** 121
Increased vascularity is the first sign of testicular differentiation in the mouse (Mackay, *et al.*) **183,** 171, *P*
Effects of retinoic acid on gene expression in the developing mouse hindbrain (Wood & Morriss-Kay) **183,** 181, *P*
Thrombin blocks neurite outgrowth of embryonic mouse neurons in vitro (Morris, *et al.*) **183,** 191, *dem*
The effects of nerve growth factor on neuropeptide expression by aged mouse sensory neurons in vitro (Jiang & Smith) **183,** 192, *dem*
The effect of GABA on neurite growth in cultures of mouse striatum (Owen, *et al.*) **183,** 192, *dem*
Activated astrocytes in the mouse brain may contain nitric oxide synthase (Wallace & Bisland) **183,** 195, *dem*
A comparison of tendon fibrocartilage in the rat, the rabbit and the mouse: a histological and immunohistochemical study (Dowthwaite, *et al.*) **183,** 197, *dem*
Granulated metrial gland cells in the uterus and placenta of the woodmouse (Stewart & Clarke) **183,** 198, *dem*
Computer-aided 3-dimensional reconstruction of the inner ear apparatus of the mouse embryo between 10·25–10·5 and 12·5–13 days p.c. (Theiler Stages 16–21) (Bartos, *et al.*) **183,** 198, *dem*
Mouth, Exfoliative cytology: a potential diagnostic tool for human oral malignancy (Murray) **183,** 178, *P*
Muscle, Anatomical variation of the insertion of scalenus anterior in adult human subjects: implications for clinical practice (Wayman, *et al.*) **183,** 165
The use of in situ hybridisation to study tissue-specific gene expression in skeletal muscle during postnatal development in response to mechanical stimuli (Goldspink) **183,** 178, *P*
The effect of vitamin E deficiency on skeletal muscle in the rat (Thomas, *et al.*) **183,** 184, *P*
Anatomical variation of the insertion of the scalenus anterior muscle in adult human subjects (Wayman, *et al.*) **183,** 185, *P*
Gene expression following the direct injection of DNA into skeletal muscle: uses and limitations (Wells) **183,** 185, *P*
An investigation of the reinnervation of muscle spindle proprioceptive pathways after nerve injury in the rat (Fullarton, *et al.*) **183,** 190, *dem*
The effect of maternal undernutrition, imposed before or after the first trimester, on muscle fibre number development in the guinea pig fetus (Dwyer, *et al.*) **183,** 200, *dem*
A morphometric study of the oxidative capacity of pectoralis major in migratory and nonmigratory quail (Skepper & Hector) **183,** 200, *dem*
Myopathy in vitamin E deficient rats: muscle fibre necrosis associated with disturbances of mitochondrial function (Thomas, *et al.*) **183,** 451
Satellite cell content in muscles of large and small mice (Brown & Stickland) **183,** 91
Muscle contracture, Is tensor fasciae latae contracture a particular feature of acute tropical motor neuropathy? (Crawford & Hobbs) **183,** 174, *P*
Muscle growth, The growth response of the lateral musculature of carp (*Cyprinus carpio* L.) to temperature (Nathanailides, *et al.*) **183,** 184, *P*
Muscle injury, Muscle injury: new aspects revealed by in situ hybridisation (Russell, *et al.*) **183,** 179, *P*
Muscle precursor cells, Electron microscopical detection of migrating β-gal-expressing muscle precursor cells (Watt, *et al.*) **183,** 184, *P*
Muscle spindles, An investigation of the reinnervation of muscle spindle proprioceptive pathways after nerve injury in the rat (Fullarton, *et al.*) **183,** 190, *dem*
Muscle stretch, Changes in length/tension properties and fatigue resistance in distracted muscles (Williams, *et al.*) **183,** 184, *P*
Mutable connective tissue, Ultrastructural and biochemical observations on proteoglycans and collagen in the mutable connective tissue of the feather star *Antedon bifida* (Echinodermata, Crinoidea) (Erlinger, *et al.*) **183,** 1
Electron microscopical findings on proteoglycans and collagen in the mutable connective tissue of the echinoderm *Antedon bifida* (Erlinger, *et al.*) **183,** 188, *P*
Myopathy, Myopathy in vitamin E deficient rats: muscle fibre necrosis associated with disturbances of mitochondrial function (Thomas, *et al.*) **183,** 451

Nasopharyngeal tonsil, Variation in the epithelium covering the human nasopharyngeal tonsil (adenoid) (Kirkpatrick, *et al.*) **183,** 199, *dem*
Nerve endings, Neuroepithelial bodies in the Fawn Hooded rat lung: morphological and neuroanatomical evidence for a sensory innervation (Van Lommel & Lauweryns) **183,** 553
Nerve grafting, The effect of intravitreal peripheral nerve graft on the sprouting of axon-like processes from the retinal ganglion cells at different distances of axotomy from the cell body (Cho & So) **183,** 169, *P*
Quantitative ultrastructural studies of axonal regeneration into peripheral nerve grafts implanted in the adult rat brain (Antoniazzi, *et al.*) **183,** 169, *P*
GAP-43 expression during axonal regeneration into long freeze-killed nerve grafts (Chong, *et al.*) **183,** 170, *P*
Cell adhesion molecules are associated with adult rat central nervous system (CNS) axons regenerating into peripheral nerve grafts (Zhang, *et al.*) **183,** 189, *dem*
Peripheral nerve graft enhances survival of cytochrome oxidase-rich retinal ganglion cells (von Bussmann, *et al.*) **183,** 189, *dem*
The presence of a peripheral nerve graft in the adult rat corpus striatum has no effect on cholinergic somal size (Woolhead & Anderson) **183,** 192, *dem*
Nerve growth factor, The effects of nerve growth factor on neuropeptide expression by aged mouse sensory neurons in vitro (Jiang & Smith) **183,** 192, *dem*
Effect of nerve growth factor and vehicle treatment on in oculo reinnervation of transplanted cerebral blood vessels (Gavazzi & Cowen) **183,** 193, *dem*
Nerve injury, Acidic fibroblast growth factor modifies the responses to axon injury of vagal preganglionic neurons in the rat (Jacques, *et al.*) **183,** 175, *P*
Postnatal dendritic development of sciatic motoneurons under normal conditions and following neonatal nerve injury in the rat (O'Hanlon & Lowrie) **183,** 189, *dem*
The fate of motoneurons in the spinal cord following peripheral nerve repair: a quantitative study using the neural tracer horseradish peroxidase (Gilmour, *et al.*) **183,** 190, *dem*
An investigation of the reinnervation of muscle spindle proprioceptive pathways after nerve injury in the rat (Fullarton, *et al.*) **183,** 190, *dem*
Neural crest, The avian neural crest targeting to the heart (Poelmann & Gittenberger-de Groot) **183,** 173, *P*
Neural tube closure, The effect of eight essential vitamins on neural tube closure in mammalian embryos cultured in vitro (Shipman, *et al.*) **183,** 202, *dem*
Neurite outgrowth, Thrombin blocks neurite outgrowth of embryonic mouse neurons in vitro (Morris, *et al.*) **183,** 191, *dem*
The effect of GABA on neurite growth in cultures of mouse striatum (Owen, *et al.*) **183,** 192, *dem*
Neurons, Acidic fibroblast growth factor modifies the responses to axon injury of vagal preganglionic neurons in the rat (Jacques, *et al.*) **183,** 175, *P*
Target-specific changes in the dendritic arbors of sympathetic neurons with age (Nesbitt) **183,** 176, *P*

Expression of motor proteins for axonal transport in different neuron types (Bennett) **183,** 182, *P*
Postnatal dendritic development of sciatic motoneurons under normal conditions and following neonatal nerve injury in the rat (O'Hanlon & Lowrie) **183,** 189, *dem*
The fate of motoneurons in the spinal cord following peripheral nerve repair: a quantitative study using the neural tracer horseradish peroxidase (Gilmour, *et al.*) **183,** 190, *dem*
Thrombin blocks neurite outgrowth of embryonic mouse neurons in vitro (Morris, *et al.*) **183,** 191, *dem*
The effects of nerve growth factor on neuropeptide expression by aged mouse sensory neurons in vitro (Jiang & Smith) **183,** 192, *dem*
An investigation into the fate of NADPH-diaphorase-containing enteric neurons implanted into the corpus striatum of adult rats (Tew, *et al.*) **183,** 193, *dem*
Differences in CGRP expression associated with particular patterns of Nissl body ultrastructure in axotomised motoneurons (Johnson, *et al.*) **183,** 193, *dem*
Immunocytochemical localisation of insulin receptors on cultured sympathetic ganglion cells (James, *et al.*) **183,** 194, *dem*

Neuropathy, Is tensor fasciae latae contracture a particular feature of acute tropical motor neuropathy? (Crawford & Hobbs) **183,** 174, *P*

Neuropeptide expression, The effects of nerve growth factor on neuropeptide expression by aged mouse sensory neurons in vitro (Jiang & Smith) **183,** 192, *dem*

Neuropeptides, Development of the peptidergic innervation of human heart (Gordon, *et al.*) **183,** 131
An immunogold study of neuropeptide coexistence in the inferior mesenteric ganglion of the guinea pig (Mitchell & Stauber) **183,** 194, *dem*
The adrenal chromaffin granule: a model for large dense core vesicles of endocrine and nervous tissue (Winkler) **183,** 237
Autonomic control of adrenal function (Edwards & Jones) **183,** 291

Nissl bodies, Differences in CGRP expression associated with particular patterns of Nissl body ultrastructure in axotomised motoneurons (Johnson, *et al.*) **183,** 193, *dem*

Nitric oxide synthase, Activated astrocytes in the mouse brain may contain nitric oxide synthase (Wallace & Bisland) **183,** 195, *dem*

North American opossum, Development of the eye in the North American opossum (McMenamin & Krause) **183,** 343

Nucleic acids, The intracellular spatial distribution of nucleic acids revealed by in situ hybridisation (Singer, *et al.*) **183,** 179, *P*

Nucleoli, Purkinje cell complements in mammalian cerebella and the biases incurred by counting nucleoli (Mwamengele, *et al.*) **183,** 155

Obturator artery, Rare origin of the obturator, inferior epigastric and medial circumflex femoral arteries from a common trunk (Sañudo, *et al.*) **183,** 161

Oestradiol receptor related protein, Immunohistochemical and semiquantitative study of the apical mitochondria-rich cells of the human prepubertal and adult epididymis (Regadera, *et al.*) **183,** 507

Optic nerve, Retinal microglia in developing rats with neonatal optic nerve crush (Chan, *et al.*) **183,** 169, *P*
Cytochemical analysis of disruption of axonal calcium homeostasis following stretch and crush injury to the adult guinea pig optic nerve (McCreath) **183,** 176, *P*

Osmoregulation, The orbital glands of the terrapin *Pseudemys scripta* in response to osmotic stress: a light and electron microscope study (Chieffi Baccari, *et al.*) **183,** 21

Osteoblasts, A comparison of the biocompatibility of bone graft substitutes for human osteoblasts (Begley) **183,** 176, *P*

Osteoclasts, Red deer antler osteoclasts (Piper & Jones) **183,** 188, *P*

Ostrich, The spiral fold of the caecum in the ostrich (*Struthio camelus*) (Bezuidenhout) **183,** 587

Oviduct, Scanning electron microscopy of goat oviductal epithelial cells at the follicular and luteal phases of the oestrous cycle (Abe, *et al.*) **183,** 415

Oxygen free radicals, A scanning electron microscopic study of the chick chorioallantoic membrane: cell death and the involvement of oxygen free radicals (Easterling) **183,** 178, *P*

Pacinian corpuscles, Distribution of pacinian corpuscles in the hand of the monkey, *Macaca fuscata* (Kumamoto, *et al.*) **183,** 149

Palate, Morphometric differences in basal cell volume in the developing oronasal epithelium before palate fusion (Chan & White) **183,** 201, *dem*
A histological morphometric study of the growth and differentiation of hamster hard palate epithelium (Cheung & White) **183,** 201, *dem*
Morphometric site differences in suprabasal cell nuclei in the fetal oronasal epithelium prior to secondary palatal shelf elevation (Chan & White) **183,** 201, *dem*

Palate development, Monoclonal antibodies recognising stage and region specific epitopes in embryonic mouse palatal epithelial cells (Dixon, *et al.*) **183,** 423

Papaverine, Intraoperative papaverine – effect on human internal thoracic artery contraction and relaxation (Hillier) **183,** 177, *P*

Paraganglia, The presence of paraganglia in the human ascending aortic fold: histological and ultrastructural studies (Lebona) **183,** 35

Parathyroid hormone-related protein gene, The expression of the parathyroid hormone-related protein gene during development (Beck, *et al.*) **183,** 180, *P*

Parturition, Parenchymal compartments of the human placenta and the effects of maternal diabetes mellitus, mode of delivery and sex of neonate (Mayhew, *et al.*) **183,** 186, *P*

Pectoralis major, A morphometric study of the oxidative capacity of pectoralis major in migratory and nonmigratory quail (Skepper & Hector) **183,** 200, *dem*

Perinatal mortality, An investigation into the factors involved in the increased perinatal mortality rate amongst female leather workers (Drage) **183,** 177, *P*

Peripheral nerve, Quantitative ultrastructural studies of axonal regeneration into peripheral nerve grafts implanted in the adult rat brain (Antoniazzi, *et al.*) **183,** 169, *P*
The effect of intravitreal peripheral nerve graft on the sprouting of axon-like processes from the retinal ganglion cells at different distances of axotomy from the cell body (Cho & So) **183,** 169, *P*
GAP-43 expression during axonal regeneration into long freeze-killed nerve grafts (Chong, *et al.*) **183,** 170, *P*
Peripheral nerve graft enhances survival of cytochrome oxidase-rich retinal ganglion cells (von Bussmann, *et al.*) **183,** 189, *dem*
Cell adhesion molecules are associated with adult rat central nervous system (CNS) axons regenerating into peripheral nerve grafts (Zhang, *et al.*) **183,** 189, *dem*
The presence of a peripheral nerve graft in the adult rat corpus striatum has no effect on cholinergic somal size (Woolhead & Anderson) **183,** 192, *dem*

Pes cavus, Arthritis of the subtalar joint associated with sustentaculum tali facet configuration (Drayer-Verhagen) **183,** 631

Pes planus, Arthritis of the subtalar joint associated with sustentaculum tali facet configuration (Drayer-Verhagen) **183,** 631

Phagocytosis, Cell death and phagocytosis of haematopoietic elements at the onset of haematopoiesis in the mouse spleen: an ultrastructural study (Sasaki, *et al.*) **183,** 113

Phenylethanolamine N-methyltransferase, Effects of ACTH and aminoglutethimide on the catecholamine content and chromaffin cell morphology of the adrenal medulla of the neonatal rat (Kent & Parker) **183,** 601

Placenta, Morphometric evidence of the human placental sluice flow theory (Karimu & Burton) **183,** 185, *P*
Parenchymal compartments of the human placenta and the effects of maternal diabetes mellitus, mode of delivery and sex of neonate (Mayhew, *et al.*) **183,** 186, *P*

The effect of maternal undernutrition on the development of placental components in the guinea pig (Dwyer, *et al.*) **183,** 186, *P*
Placental cell migration through tight junctions (Wooding & Brandon) **183,** 187, *P*
Maternal anaemia and terminal villus structure in the mature human placenta (Reshetnikova & Burton) **183,** 187, *P*
Granulated metrial gland cells in the uterus and placenta of the woodmouse (Stewart & Clarke) **183,** 198, *dem*
The effects of mode of delivery and sex of newborn on placental morphology in control and diabetic pregnancies (Mayhew, *et al.*) **183,** 545
Polyprotodonts, Comparative anatomical studies on the thyroid and thymic arteries. II. Polyprotodont marsupials (Yamasaki) **183,** 359
Post-translational modification, Novel peptides from adrenomedullary chromaffin vesicles (Sigafoos, *et al.*) **183,** 253
Prechordal mesoderm, The avian prechordal head region: a morphological study (Seifert, *et al.*) **183,** 75
Prechordal plate, The avian prechordal head region: a morphological study (Seifert, *et al.*) **183,** 75
Precursor processing, Novel peptides from adrenomedullary chromaffin vesicles (Sigafoos, *et al.*) **183,** 253
Pregnancy, The effect of maternal undernutrition, imposed before or after the first trimester, on muscle fibre number development in the guinea pig fetus (Dwyer, *et al.*) **183,** 200, *dem*
Primitive streak, Primordial germ cells in the primitive streak stages chick embryo as studied by scanning electron microscopy (England & Matsumura) **183,** 67
Primordial germ cells, Primordial germ cells in the primitive streak stages chick embryo as studied by scanning electron microscopy (England & Matsumura) **183,** 67
Proprioception, An investigation of the reinnervation of muscle spindle proprioceptive pathways after nerve injury in the rat (Fullarton, *et al.*) **183,** 190, *dem*
Prostate, Induction of prostatic morphogenesis by neonatal rat seminal vesicle mesenchyme (Wong & Kong) **183,** 171, *P*
Protein gene product 9·5, Immunohistochemistry for protein gene product 9·5 in the enteric nervous system (Krammer, *et al.*) **183,** 170, *P*
Proteoglycans, Ultrastructural and biochemical observations on proteoglycans and collagen in the mutable connective tissue of the feather star *Antedon bifida* (Echinodermata, Crinoidea) (Erlinger, *et al.*) **183,** 1
Electron microscopical findings on proteoglycans and collagen in the mutable connective tissue of the echinoderm *Antedon bifida* (Erlinger, *et al.*) **183,** 188, *P*
Pseudemys scripta, The orbital glands of the terrapin *Pseudemys scripta* in response to osmotic stress: a light and electron microscope study (Chieffi Baccari, *et al.*) **183,** 21
Purkinje neurons, Purkinje cell complements in mammalian cerebella and the biases incurred by counting nucleoli (Mwamengele, *et al.*) **183,** 155

Quail, The early development of the pulmonary and bronchial vasculature in the quail embryo (Gittenberger-de Groot, *et al.*) **183,** 172, *P*
A morphometric study of the oxidative capacity of pectoralis major in migratory and nonmigratory quail (Skepper & Hector) **183,** 200, *dem*
The avian prechordal head region: a morphological study (Seifert, *et al.*) **183,** 75

Rabbit, A comparison of tendon fibrocartilage in the rat, the rabbit and the mouse: a histological and immunohistochemical study (Dowthwaite, *et al.*) **183,** 197, *dem*
Rat, Quantitative ultrastructural studies of axonal regeneration into peripheral nerve grafts implanted in the adult rat brain (Antoniazzi, *et al.*) **183,** 169, *P*
Retinal microglia in developing rats with neonatal optic nerve crush (Chan, *et al.*) **183,** 169, *P*
An electron microscopic study of glycogen distribution in the spinal cord of rats after peripheral axotomy (Shaomei & Atkinson) **183,** 170, *P*
Microvascular responses to ischaemia and reperfusion in the isolated rat heart (McCarthy) **183,** 177, *P*
Differential gene expression in the dorsal hippocampus of the normal adult rat (Najlerahim & Heath) **183,** 181, *P*
Increased synthesis of epidermal growth factor mRNA in the kidneys of streptozotocin-induced diabetic rats revealed by in situ hybridisation histochemistry (Mundy, *et al.*) **183,** 182, *P*
An investigation of CYP4A mRNA expression in the embryonic rat using in situ hybridisation (Simpson, *et al.*) **183,** 183, *P*
The effect of vitamin E deficiency on skeletal muscle in the rat (Thomas, *et al.*) **183,** 184, *P*
Cell adhesion molecules are associated with adult rat central nervous system (CNS) axons regenerating into peripheral nerve grafts (Zhang, *et al.*) **183,** 189, *dem*
Postnatal dendritic development of sciatic motoneurons under normal conditions and following neonatal nerve injury in the rat (O'Hanlon & Lowrie) **183,** 189, *dem*
The presence of a peripheral nerve graft in the adult rat corpus striatum has no effect on cholinergic somal size (Woolhead & Anderson) **183,** 192, *dem*
An investigation into the fate of NADPH-diaphorase-containing enteric neurons implanted into the corpus striatum of adult rats (Tew, *et al.*) **183,** 193, *dem*
A comparison of tendon fibrocartilage in the rat, the rabbit and the mouse: a histological and immunohistochemical study (Dowthwaite, *et al.*) **183,** 197, *dem*
Early structure of the wall of the sperm granuloma in the vasectomised rat (McGadey, *et al.*) **183,** 198, *dem*
Morphometric comparison of the kidneys of dwarf and Lewis rats (Baillie, *et al.*) **183,** 202, *dem*
Intraventricular macrophages in the lateral ventricles with special reference to epiplexus cells: a quantitative analysis and their uptake of fluorescent tracer injected intraperitoneally in rats of different ages (Lu, *et al.*) **183,** 405
The tammar wallaby (*Macropus eugenii*) and the Sprague–Dawley rat: comparative anatomy and physiology of inguinoscrotal testicular descent (Griffiths, *et al.*) **183,** 441
Myopathy in vitamin E deficient rats: muscle fibre necrosis associated with disturbances of mitochondrial function (Thomas, *et al.*) **183,** 451
Histochemical evidence for microglia-like macrophages in the rat trigeminal ganglion (Glenn, *et al.*) **183,** 475
A light and electron microscopic quantitative analysis of the innervation of axillary lymph nodes in juvenile and old rats (Novotny, *et al.*) **183,** 57
Effects of ACTH and aminoglutethimide on the catecholamine content and chromaffin cell morphology of the adrenal medulla of the neonatal rat (Kent & Parker) **183,** 601
Uptake of tracer by the epiplexus cells via the choroid plexus epithelium following an intravenous or intraperitoneal injection of horseradish peroxidase in rats (Lu, *et al.*) **183,** 609
Vascular and parenchymal innervation of the urinary tract in young and old rats (Warburton & Santer) **183,** 191, *dem*
Neuroepithelial bodies in the Fawn Hooded rat lung: morphological and neuroanatomical evidence for a sensory innervation (Van Lommel & Lauweryns) **183,** 553
Red deer, Red deer antler osteoclasts (Piper & Jones) **183,** 188, *P*
Reinnervation, Effect of nerve growth factor and vehicle treatment on in oculo reinnervation of transplanted cerebral blood vessels (Gavazzi & Cowen) **183,** 193, *dem*
Reperfusion injury, Microvascular responses to ischaemia and reperfusion in the isolated rat heart (McCarthy) **183,** 177, *P*
Respiratory system, Neuroepithelial bodies in the Fawn Hooded rat lung: morphological and neuroanatomical evidence for a sensory innervation (Van Lommel & Lauweryns) **183,** 553
Rete ovarii, Gonadal development in the opossum, *Monodelphis domestica*: the rete ovarii does not contribute to the steroidogenic tissues (Maitland & Ullmann) **183,** 43

Retina, Retinal microglia in developing rats with neonatal optic nerve crush (Chan, *et al.*) **183,** 169, *P*
The effect of intravitreal peripheral nerve graft on the sprouting of axon-like processes from the retinal ganglion cells at different distances of axotomy from the cell body (Cho & So) **183,** 169, *P*
Peripheral nerve graft enhances survival of cytochrome oxidase-rich retinal ganglion cells (von Bussmann, *et al.*) **183,** 189, *dem*
Development of the eye in the North American opossum (McMenamin & Krause) **183,** 343
Retinoic acid, Effects of retinoic acid on gene expression in the developing mouse hindbrain (Wood & Morriss-Kay) **183,** 181, *P*
Rhodamine labelling, Intraventricular macrophages in the lateral ventricles with special reference to epiplexus cells: a quantitative analysis and their uptake of fluorescent tracer injected intraperitoneally in rats of different ages (Lu, *et al.*) **183,** 405

Salinity tolerance, The orbital glands of the terrapin *Pseudemys scripta* in response to osmotic stress: a light and electron microscope study (Chieffi Baccari, *et al.*) **183,** 21
Salmo trutta, Fine structure and development of ionocyte areas in the labyrinth of the trout (*Salmo trutta fario*) (Becerra & Anadon) **183,** 463
Salt cells, The orbital glands of the terrapin *Pseudemys scripta* in response to osmotic stress: a light and electron microscope study (Chieffi Baccari, *et al.*) **183,** 21
Satellite cells, Satellite cell content in muscles of large and small mice (Brown & Stickland) **183,** 91
Scalenus anterior, Anatomical variation of the insertion of scalenus anterior in adult human subjects: implications for clinical practice (Wayman, *et al.*) **183,** 165
Anatomical variation of the insertion of the scalenus anterior muscle in adult human subjects (Wayman, *et al.*) **183,** 185, *P*
Schwann cell, An investigation of the Schwann cell plasma in experimental allergic neuritis using freeze-fracture electron microscopy (Howe & Ghabriel) **183,** 171, *P*
Second messengers, Noncholinergic control of adrenal catecholamine secretion (Livett & Marley) **183,** 279
Secretion, The adrenal chromaffin granule: a model for large dense core vesicles of endocrine and nervous tissue (Winkler) **183,** 237
Exocytosis in adrenal chromaffin cells (Burgoyne, *et al.*) **183,** 309
Seminal vesicle, Induction of prostatic morphogenesis by neonatal rat seminal vesicle mesenchyme (Wong & Kong) **183,** 171, *P*
Sensory neurons, The effects of nerve growth factor on neuropeptide expression by aged mouse sensory neurons in vitro (Jiang & Smith) **183,** 192, *dem*
Sex of neonate, The effects of mode of delivery and sex of newborn on placental morphology in control and diabetic pregnancies (Mayhew, *et al.*) **183,** 545
Sexual dimorphism, A study of lateral symmetry and sexual dimorphism in the cerebral hemispheres of selected domestic mammals (Mwamengele, *et al.*) **183,** 174, *P*
Sexual dimorphism in the human face assessed by euclidean distance matrix analysis (Ferrario, *et al.*) **183,** 593
Sheep, Lymphatic drainage from the distal small intestine in sheep (Lowden & Heath) **183,** 13
Skeletal muscle, The use of in situ hybridisation to study tissue-specific gene expression in skeletal muscle during postnatal development in response to mechanical stimuli (Goldspink) **183,** 178, *P*
Changes in length/tension properties and fatigue resistance in distracted muscles (Williams, *et al.*) **183,** 184, *P*
The effect of vitamin E deficiency on skeletal muscle in the rat (Thomas, *et al.*) **183,** 184, *P*
A morphometric study of the oxidative capacity of pectoralis major in migratory and nonmigratory quail (Skepper & Hector) **183,** 200, *dem*
Skeleton, An interesting skeleton in the cupboard (Kaufman) **183,** 197, *dem*
Skin, Distribution of pacinian corpuscles in the hand of the monkey, *Macaca fuscata* (Kumamoto, *et al.*) **183,** 149
Sluice flow theory, Morphometric evidence of the human placental sluice flow theory (Karimu & Burton) **183,** 185, *P*
Sperm granuloma, Early structure of the wall of the sperm granuloma in the vasectomised rat (McGadey, *et al.*) **183,** 198, *dem*
Spermiation, Spermiogenesis and spermiation in the Japanese quail (*Coturnix coturnix japonica*) (Lin & Jones) **183,** 525
Spermiogenesis, Spermiogenesis and spermiation in the Japanese quail (*Coturnix coturnix japonica*) (Lin & Jones) **183,** 525
Spinal cord, An electron microscopic study of glycogen distribution in the spinal cord of rats after peripheral axotomy (Shaomei & Atkinson) **183,** 170, *P*
The fate of motoneurons in the spinal cord following peripheral nerve repair: a quantitative study using the neural tracer horseradish peroxidase (Gilmour, *et al.*) **183,** 190, *dem*
Spiral fold, The spiral fold of the caecum in the ostrich (*Struthio camelus*) (Bezuidenhout) **183,** 587
Spleen, Cell death and phagocytosis of haematopoietic elements at the onset of haematopoiesis in the mouse spleen: an ultrastructural study (Sasaki, *et al.*) **183,** 113
Split line direction, The biomechanical ambiguity of the articular surface (Kamalanathan & Broom) **183,** 567
Streptozotocin, Increased synthesis of epidermal growth factor mRNA in the kidneys of streptozotocin-induced diabetic rats revealed by in situ hybridisation histochemistry (Mundy, *et al.*) **183,** 182, *P*
Striatum, The effect of GABA on neurite growth in cultures of mouse striatum (Owen, *et al.*) **183,** 192, *dem*
Struthio camelus, The spiral fold of the caecum in the ostrich (*Struthio camelus*) (Bezuidenhout) **183,** 587
Subclavian vein, Anatomical variation of the insertion of scalenus anterior in adult human subjects: implications for clinical practice (Wayman, *et al.*) **183,** 165
Subclavian artery, Blood supply to the cranial venae cavae and the heart in the laboratory shrew (*Suncus murinus*) (Isomura) **183,** 537
Submandibular gland, An investigation of the vascular organisation of the canine submandibular gland (Lung) **183,** 619
Substance P, Noncholinergic control of adrenal catecholamine secretion (Livett & Marley) **183,** 279
Sulcus, Deep and shallow forms of the sulcus for extensor carpi ulnaris (Nakashima, *et al.*) **183,** 635
Suncus murinus, Blood supply to the cranial venae cavae and the heart in the laboratory shrew (*Suncus murinus*) (Isomura) **183,** 537
Surfactants, Fine structure of the middle ear epithelium in the chicken (*Gallus gallus*) (Giannessi & Ruffoli) **183,** 103
Sustentaculum tali, Arthritis of the subtalar joint associated with sustentaculum tali facet configuration (Drayer-Verhagen) **183,** 631
Sympathetic ganglion cells, Immunocytochemical localisation of insulin receptors on cultured sympathetic ganglion cells (James, *et al.*) **183,** 194, *dem*
Sympathetic neurons, Target-specific changes in the dendritic arbors of sympathetic neurons with age (Nesbitt) **183,** 176, *P*

Talocalcaneal joint, Arthritis of the subtalar joint associated with sustentaculum tali facet configuration (Drayer-Verhagen) **183,** 631
Talus, Arthritis of the subtalar joint associated with sustentaculum tali facet configuration (Drayer-Verhagen) **183,** 631
Tammar, The tammar wallaby (*Macropus eugenii*) and the Sprague–Dawley rat: comparative anatomy and physiology of inguinoscrotal testicular descent (Griffiths, *et al.*) **183,** 441
Teeth, Vertebrate homeobox genes: embryos, teeth and bones (Sharpe) **183,** 179, *P*
Confocal autofluorescence microscopy of human dental cementum: incremental lines in an age series (Roberts, *et al.*) **183,** 195, *dem*

Teleost fish, Fine structure and development of ionocyte areas in the labyrinth of the trout (*Salmo trutta fario*) (Becerra & Anadon) **183,** 463

Temperature, The growth response of the lateral musculature of carp (*Cyprinus carpio* L.) to temperature (Nathanailides, *et al.*) **183,** 184, *P*

Tendon fibrocartilage, A comparison of tendon fibrocartilage in the rat, the rabbit and the mouse: a histological and immunohistochemical study (Dowthwaite, *et al.*) **183,** 197, *dem*

Tensor fasciae latae, Is tensor fasciae latae contracture a particular feature of acute tropical motor neuropathy? (Crawford & Hobbs) **183,** 174, *P*

Teratogenesis, Hyperglycaemia and hyperosmolality: their teratogenic potential and possible mechanisms of action (Travers, *et al.*) **183,** 172, *P*

Terminal villi, Maternal anaemia and terminal villus structure in the mature human placenta (Reshetnikova & Burton) **183,** 187, *P*

Testicular descent, The tammar wallaby (*Macropus eugenii*) and the Sprague–Dawley rat: comparative anatomy and physiology of inguinoscrotal testicular descent (Griffiths, *et al.*) **183,** 441

Testis, Increased vascularity is the first sign of testicular differentiation in the mouse (Mackay, *et al.*) **183,** 171, *P*

Thrombin, Thrombin blocks neurite outgrowth of embryonic mouse neurons in vitro (Morris, *et al.*) **183,** 191, *dem*

Thymus, Comparative anatomical studies on the thyroid and thymic arteries. II. Polyprotodont marsupials (Yamasaki) **183,** 359

Thyroid glands, Comparative anatomical studies on the thyroid and thymic arteries. II. Polyprotodont marsupials (Yamasaki) **183,** 359

Tight junctions, Placental cell migration through tight junctions (Wooding & Brandon) **183,** 187, *P*

Tongue, Morphometric investigations of epithelial change during the development of the ventral surface of the hamster tongue (Go & White) **183,** 200, *dem*

Trigeminal ganglion, Histochemical evidence for microglia-like macrophages in the rat trigeminal ganglion (Glenn, *et al.*) **183,** 475

Trigeminal neurotropic factor, Is trigeminal neurotropic factor ('max' factor) involved in determination of innervation density? (Warrilow) **183,** 175, *P*

Trophoblast, Confocal and conventional immunofluorescence and ultrastructural localisation of intracellular strength-giving components of human amniochorion (Ockleford, *et al.*) **183,** 483

Turtle, The embryological development of primary visual centres in the turtle *Emys orbicularis* (Hergueta, *et al.*) **183,** 367

Undernutrition, The effect of maternal undernutrition on the development of placental components in the guinea pig (Dwyer, *et al.*) **183,** 186, *P*

The effect of maternal undernutrition, imposed before or after the first trimester, on muscle fibre number development in the guinea pig fetus (Dwyer, *et al.*) **183,** 200, *dem*

Urinary tract, Vascular and parenchymal innervation of the urinary tract in young and old rats (Warburton & Santer) **183,** 191, *dem*

Uterus, Granulated metrial gland cells in the uterus and placenta of the woodmouse (Stewart & Clarke) **183,** 198, *dem*

Vagus nerve, Acidic fibroblast growth factor modifies the responses to axon injury of vagal preganglionic neurons in the rat (Jacques, *et al.*) **183,** 175, *P*

Vascular contractility, Intraoperative papaverine – effect on human internal thoracic artery contraction and relaxation (Hillier) **183,** 177, *P*

Vasculature, The early development of the pulmonary and bronchial vasculature in the quail embryo (Gittenberger-de Groot, *et al.*) **183,** 172, *P*

Vascular and parenchymal innervation of the urinary tract in young and old rats (Warburton & Santer) **183,** 191, *dem*

Effect of nerve growth factor and vehicle treatment on in oculo reinnervation of transplanted cerebral blood vessels (Gavazzi & Cowen) **183,** 193, *dem*

Vasectomy, Early structure of the wall of the sperm granuloma in the vasectomised rat (McGadey, *et al.*) **183,** 198, *dem*

Venous valves, An investigation of the vascular organisation of the canine submandibular gland (Lung) **183,** 619

Vesicular transport, Uptake of tracer by the epiplexus cells via the choroid plexus epithelium following an intravenous or intraperitoneal injection of horseradish peroxidase in rats (Lu, *et al.*) **183,** 609

Vimentin, Confocal and conventional immunofluorescence and ultrastructural localisation of intracellular strength-giving components of human amniochorion (Ockleford, *et al.*) **183,** 483

Visual system, The embryological development of primary visual centres in the turtle *Emys orbicularis* (Hergueta, *et al.*) **183,** 367

Vitamin E deficiency, The effect of vitamin E deficiency on skeletal muscle in the rat (Thomas, *et al.*) **183,** 184, *P*

Myopathy in vitamin E deficient rats: muscle fibre necrosis associated with disturbances of mitochondrial function (Thomas, *et al.*) **183,** 451

Vitamins, The effect of eight essential vitamins on neural tube closure in mammalian embryos cultured in vitro (Shipman, *et al.*) **183,** 202, *dem*

Woodmouse, Granulated metrial gland cells in the uterus and placenta of the woodmouse (Stewart & Clarke) **183,** 198, *dem*

Wound healing, Further studies on wound healing in the midbrain of the chick embryo (Lawson & England) **183,** 190, *dem*

X-ray microanalysis, Comparative morphology, cytochemistry and innervation of chromaffin tissue in vertebrates (Scheuermann) **183,** 327
